- From 2 Jan 2000 to 4 Oct 2004 provided customer computer support to the 134th ARW by installing, configuring, and troubleshooting computer systems within the wing. Using the computer work order system, I planned the delivery of customer support based on the priority of the need to the customer and the base as a whole. I developed a system to track, report and resolve problems using historical problem data and projected needs information. I also planned training classes for new software introduced as well as to address common problem areas. Fluent in the use of various computer languages such as C/C++ and Java. **(YES)**

Knowledge, Skills and Abilities (KSAs)

- Embed within work experience
- Used by personnelists to validate experience
- Be very Specific and tell us How

Biggest Problems

No Specific Dates (provide month and year)

If only year is provided, we can only “partially credit” that year

Limited Description of Duties Performed (provide enough info to convey the specialized requirements that you individually performed in the job)

Generic Resumes (One resume used for a variety of jobs - will work only if you are very specific and personnelist can extract the specialized experience for all jobs, which is not the norm)

Not showing both military and civilian experience (Credit is applied for both your and civilian jobs, except for overlapping periods. Inactive Duty and Active Duty time can increase your chance of experience and time needed to qualify for the position)

Final Notes

Do not attach the following to your resume:

- Recommendation Letters
- Training Certificates (Unless specifically required in Announcement)
- Transcripts (unless applying for a position that allows credit for education)
- Other documentation (e.g., DD214s, appraisals).
